August 2025

1   calculate interest

```c
#include <stdio.h>

int main() {
    int principle,rate,time,interest;
    printf("enter principle,rate,time: ");
    scanf("%d * %d * %d / 100", &principle,&rate,&time);
    interest=(principle *rate* time)/100;
    printf("interest=%d\n", interest);
    return 0;
    }
```
